

## Heguru Method: Interview with Heguru founders

The extended Heguru Method facilities at Fusionopolis being officially opened

**Q: Mrs Henmi, what would you say if there are parents out there who are thinking about why they should send their children to Heguru @ Fusionopolis? What do you have to say to them?**

**A:** First, consider that the human brain is divided into right and left. Education that stimulates the left brain can be found in any country.

However, education programmes that specifically target right brain stimulation from when children are at a very young age, like Heguru's, are few and far between.

Now that such a programme is available, depending on a child's age, we can provide education that develops both the left and right brains simultaneously, and even draw out the right brain's intrinsic power when the child is still in the womb.

Education is not a question to which there is one perfect answer, but we will draw out as much of the right brain's intrinsic power as we can.

In order to do so, it is better to start early.

Hence, we do our best for our students, so that they can be cheerful, energetic and have fun as they learn together. I feel that it is not ideal if the children are not enjoying themselves.

They would not want to be somewhere (in class) if they are not having fun there.

Ideally, we would like to create an environment where the child is enjoying themselves from the bottom of their hearts. That's why I would recommend parents to send their children to Heguru @ Fusionopolis.

I believe that every child has potential.

Observe their behaviour, draw out their abilities and give your children praise and recognition. When you believe in them, a child can realise their abilities to their full potential. It is very important to understand this.

Why not check out the Heguru Method Learning Centre at Fusionopolis today?

**Q: What about you, Mr. Henmi? Why should parents send (their child) to this centre at Fusionopolis?**

**A:** Well, first and foremost, the energetic teachers are great representatives for Heguru. All of them have powerful energy. On top of that, I think that they are very patient people.

Ultimately, children love to be in a positive environment packed with powerful energy, therefore I think that's a great starting point for them.

On that note, I often receive feedback that it is not only the child who is learning, but also that the mom and dad also benefit greatly from the programme.

In this sense, Heguru lends a big support to the whole family. When we hear that both parents and children have grown and are continuing to grow together on this learning journey, all of us here at Heguru feel very touched and glad.
